The measure of a society is how it treats its most vulnerable. At LTPCT, we belive true progress is achieved when no one is left behind.

Mr A.M. Naik

MEXY XAVIER/ FORBES INDIA PICTURE CREDIT

Dear Friends,

Our Annual Report this year is built around the theme of 'Reaching the Unreached'. This is an India that lies within our borders but remains alien to many- untouched, unreached and unrewarded. True progress, I have always believed, lies not in the spread or scale of what we do, but in the depth of how much we touch lives.

At LTPCT, we have accordingly chosen the road less travelled. We go out of our way to expand the footprint of progress to cover people and places outside the everyday map. We delve deep into the lives of the marginalized and we do our best to ensure that no one is left behind.

In the tribal heartlands of South Gujarat and Maharashtra even aspiration is a luxury. It is here that our mission comes to the fore: breaking the barriers of accessibility and providing tools for empowerment. This year, we expanded educational access to over 23,000 tribal children, delivered healthcare services to 15,000 individuals through our mobile units, and enabled around 3,100 families to achieve financial independence through skill-building and livelihood programmes.

I have been impressed by the fortitude of the communities we serve. From the farmers welcoming the installation of 70 solar lift irrigation projects to mothers prioritizing education for their daughters, these stories fuel our determination. Our work, guided by the principles of inclusivity, empowerment and sustainability, is a collaborative effort with these communities, local leaders, and partners.

As I reflect on our journey, I see not just the strides we have made but also the immense potential that lies ahead. Challenges will persist, but so will our resolve. Together, we will deepen our impact, fostering resilient, thriving communities, and ensuring that opportunity reaches every doorstep.

To our donors, partners, and the entire LTPCT family, thank you for your unwavering belief in this mission. Your support will help us as we work towards 'Reaching the Unreached'.

Warm regards,

A.M. Naik

3

2022

Education and STEM

Enhanced focus on STEM education through the Science on Wheels program, impacting 46,000+ students.

Sustainability Efforts

Implementation of drip irrigation systems for jasmine plantations and crop diversification programs in Vikramgad.

2021

Integrated Development:

Expansion of CCDP to additional aspirational blocks like Vikramgad, focusing on holistic community development.

Healthcare Initiatives:

Introduction of mobile health units and mental health awareness campaigns in rural Gujarat.

2020

COVID-19 Response

Emergency interventions to support education continuity for 23,000+ children through remote learning and digital resources.

2004

L&T Public Charitable Trust (LTPCT) is established to formalize Larsen & Toubro's commitment to social responsibility.

LARSEN & TOUBROPublic Charitable Trust

2023

1.21 Million Lives Transformed:

Achievement of a significant milestone in impacting over a million lives through education, skill building, healthcare, and water management initiatives.

Skill India Alignment:

Vocational training at ANTTC aligns with India's National Skill Development Mission.

2019

Water Management:

Launch of large-scale Jeevan water initiatives, including solar lift irrigation systems and check dam construction in Vikramgad and other regions.

2017-18

Skill Development Expansion

Launch of the Anil Naik Technical Training Centre (ANTTC) in Gujarat to provide vocational training to youth and women.

Advanced Education Program:

Introduction of the Read India Advanced Program in Talasari, focusing on language and math skills for primary students.

2009

Women's Skill Development

Women's Skill Development programme to promote gender equality

2013

Education Initiative:

Launch of the Vidya Program, focusing on improving literacy rates and providing quality education to underprivileged children.

Bridging Gaps & Overcoming Barriers

LARSEN & TOUBRO
Public Charitable Trust

An in-depth look at how LTPCT overcomes the logistical, geographical, and socio-economic barriers to bring its programs to the most inaccessible regions

EDUCATION

Provide access to quality education for underprivileged children

LIVELIHOOD & SKILLS

Create opportunities for skill building among unemployed youth, women, and school dropouts

HEALTHCARE

Improve health outcomes through awareness programs and treatment access.

CLEAN WATER

Address water scarcity with innovative irrigation and sanitation solutions

Key Statistics

- Communities Served:
 5 districts across Gujarat, Maharashtra
 Tamil Nadu
- Lives Impacted:

 1 Lakh + through education, healthcare, and clean water access

Expected Outcomes

- Increased learning outcomes
- Reduced water scarcity and improved agricultural output
- Healthier communities with lower migration rates
- Sustainable economic growth through skill-based programs

Comprehensive Community Development Program (CCDP), is a structured, five-year initiative by LTPCT aimed at uplifting remote, underserved blocks through a multi-faceted development approach. Designed to bridge critical gaps in healthcare, education, water access, and economic opportunity, CCDP empowers communities to become self-sufficient and resilient. This program addresses the barriers in accessing basic services, especially in regions where literacy rates, healthcare access, and economic resources are limited. By implementing targeted interventions, CCDP serves as a critical bridge to reduce inequality and foster sustainable growth.

LTPCT AT A GLANCE

19 YEARS OF IMPACT

At Larsen & Toubro Public Charitable Trust (LTPCT), we are driven by a profound commitment to creating visible, sustainable change across India. Established to amplify social responsibility and foster development, our initiatives focus on four critical pillars: education, healthcare, skill building & livelihood and water management. These efforts align with our vision to uplift underserved communities and ensure holistic development for future generations.

OUR VISION

To bring about sustainable development in society through well-directed activities in the fields of skill building, water management, education, health, and holistic child development.

OUR MISSION

EDUCATION

Provide access to quality education for underprivileged children.

SKILL BUILDING & LIVELIHOODS

Create opportunities for skill building among unemployed youth, women, and school dropouts.

HEALTHCARE

Improve health outcomes through awareness programs and treatment access.

WATER MANAGEMENT Address water scarcity with innovative irrigation and sanitation solutions.

lives transformed through interventions in education, healthcare, and livelihood programs.

Addressing critical issues such as literacy gaps, healthcare access, and water scarcity in regions with tribal populations exceeding 90%, such as Vikramgad.

Promoting self-reliance through localized skill-building initiatives and sustainable agricultural practices.

LTPCT is not just a charitable entity—it is a movement to inspire resilience and growth in India's most underserved communities. With every initiative, we are working toward a future where opportunity, dignity and growth are accessible to all.

MAPPING HOPE

Larsen & Toubro Public Charitable Trust (LTPCT) is unwavering in its commitment to driving meaningful change, focusing on regions where impact can be both profound and lasting.

WHAT IS AN ASPIRATIONAL BLOCK?

An aspirational block is a geographic area identified by the Government of India for its potential for transformative growth despite high levels of poverty, limited resources, and infrastructural gaps. These regions are often underserved and face barriers in areas like healthcare, education, and livelihood opportunities. The Government's Aspirational Block Program targets blocks like Vikramgad in Maharashtra to accelerate their development and reduce disparities through focused, data-driven interventions.

Vikramgad in Maharashtra, for example, has been identified as an aspirational block due to its high poverty rates, limited infrastructure, and a predominantly tribal population, accounting for around 92% of its residents. Many communities here experience pressing issues like low literacy rates (around 63.78%), widespread water scarcity, and severe health and nutrition deficiencies, making Vikramgad a priority for comprehensive community development

VIKRAMGAD

FOSTERING TRANSFORMATION IN MAHARASHTRA

Vikramgad, designated as an aspirational block nestled in the quiet hills of Maharashtra, represents a region where daily life is an uphill struggle. The community faces significant challenges, with limited access to education, healthcare, and clean water. LTPCT has made Vikramgad a focal point for its development efforts, recognizing the urgency to address poverty, unemployment, and social stagnation that have long held the region back. By focusing on holistic solutions, LTPCT is tackling these issues head-on—upgrading schools, providing support for scholarships exams for underprivileged students, and delivering critical healthcare through mobile units. Vikramgad is now on the path to sustainable transformation, where livelihood development programs are empowering locals with new opportunities, allowing them to break free from the cycle of deprivation and build a future filled with promise.

LTPCT's approach to development in aspirational blocks like Vikramgad is both strategic and compassionate, targeting long-term improvements over a five-year period. This block-wise model allows us to focus intensely on critical areas, including healthcare access, clean water initiatives, and education, to create a sustainable infrastructure that empowers communities to thrive. For instance, water scarcity, a long-standing issue in Vikramgad, is mitigated through integrated water management practices such as irrigation projects and rainwater harvesting systems, significantly reducing the need for migration and enhancing agricultural output.

KHAREL - ANTTC

ANIL NAIK TECHNICAL TRAINING CENTRE - A HUB OF EDUCATION AND SKILL DEVELOPMENT

Kharel, Gujarat, is a shining example of LTPCT's commitment to addressing both education and skills development in marginalised communities.

As a location home to the Anil Naik Technical Training Centre (ANTTC), Kharel serves as a vital centre for school dropout youth who are eager to improve their lives through technical and vocational training. Since its establishment, ANTTC has enrolled over 2,000 students, providing essential technical and vocational training aimed at empowering youth to secure employment and achieve financial independence. Schools are being enhanced, teacher training is ongoing, and students are encouraged to pursue both academic and vocational paths.

From our perspective, investing in education and skill development is vital for several reasons:

Empowerment: Providing youth with practical skills helps them to break the cycle of poverty, enabling them to support their families and contribute positively to the community.

Economic Growth: By enhancing the skills of the local workforce, ANTTC contributes to the broader socio-economic development of the region, fostering an environment where businesses can thrive.

Sustainability: Through skill development, LTPCT helps create self-sustaining futures for individuals, which can lead to more stable communities less reliant on external economic factors.

ANTTC is playing a crucial role in transforming the educational landscape of Kharel, helping individuals build better self-sustaining futures while simultaneously contributing to regional growth and stability. 16

SUBIR

REVITALISING THROUGH COMPREHENSIVE DEVELOPMENT

In the remote aspirational block of Subir, Gujarat, seasonal migration is a harsh reality for many families. Subir is home to a **95% tribal population**, primarily consisting of the Bhil, Rabari, Sidhi, and Ahir communities with a literacy rate of **74.8%**. The Bhils are the largest tribe, known for their expertise in archery and their deep knowledge of local terrain. The Rabari community, which has pastoral roots, primarily engages in dairy farming. The Sidhi people have a unique cultural heritage, having migrated from East Africa, while the Ahirs are known for cow herding and agricultural activities.

Subir faces significant challenges regarding water scarcity, with 96.7% of agricultural land un-irrigated. The block has a total area of approximately hectares, with around 756 hectares dedicated to agriculture, predominantly un-irrigated. Sustainable water management interventions are crucial, as much of the agricultural land remains vulnerable to seasonal droughts. The urgent need for improved water access and irrigation systems is highlighted by the reliance on seasonal migration, where families would leave in search of work for wages as low as Rs. 250 per day. Driven by necessity, residents have to leave their homes for months at a time, often travelling far to secure basic income. Recognizing this cycle of struggle, LTPCT's intervention in Subir has become a turning point. LTPCT's sustainable water management in Subir supports stable livelihoods by improving irrigation and clean water access, reducing migration pressures. Alongside this, digital skilling programs and the Science on Wheels initiative enhance education by fostering STEM engagement. Health initiatives focus on maternal and child care, providing essential services, nutritional guidance, and early childhood support. Together, these efforts drive holistic development, improving quality of life and building a resilient, self-sustaining community.

VANSDA

A JOURNEY OF HOLISTIC TRANSFORMATION

Nestled in Gujarat's tribal belt, Vansda is a region rich in natural beauty, surrounded by forests and hills, yet it faces significant socio-economic challenges. With over 90% of its population belonging to Scheduled Tribes, including Bhils, Dhodias, and Gamits, the region struggles with low literacy rates, inadequate healthcare, and limited livelihood opportunities. The Bhils are known for their deep connection to the land and forest, while the Dhodias and Gamits have rich agricultural traditions but face barriers due to water scarcity and lack of resources. A majority of Vansda's agricultural land is un-irrigated, forcing dependence on rainfed farming and reducing productivity. Through solar lift irrigation systems, LTPCT is transforming agricultural productivity in Vansda, enabling farmers to cultivate up to three crops annually, including paddy, vegetables, and pulses. These systems reduce dependency on erratic rainfall and seasonal migration, allowing families to sustain livelihoods locally. Limited access to quality education leads to high dropout rates and minimal skill development. The Vidya program addresses educational gaps by introducing digital literacy initiatives, improving school infrastructure, and training teachers. STEM-focused initiatives like Science on Wheels bring interactive science education to tribal children, sparking curiosity and innovation. Most families rely on subsistence farming or daily wage labor, with few opportunities for economic growth. Programs like tailoring empower women and youth, helping them achieve economic independence. LTPCT also supports sustainable agricultural practices, providing training and access to modern farming techniques. Through mobile health units and community health programs, LTPCT addresses maternal health, child nutrition, and preventive care. These interventions have significantly improved health outcomes in the region.

LTPCT's holistic approach in Vansda has not only improved agricultural yields and reduced migration but also enhanced access to education and healthcare. By empowering local communities with skills, resources, and knowledge, LTPCT is fostering a resilient, self-sustaining Vansda, where families can thrive in harmony with their environment. Vansda's transformation underscores the power of community-driven development, blending innovation with cultural sensitivity to build a brighter future for all.

EMPOWERING MINDS THROUGH EDUCATION

The Vidyaa program creates opportunities for quality education in underprivileged communities, fostering curiosity and resilience among over 23,000 children. By integrating STEM education through a Hub-and-Spoke model, with science centers and mobile labs, it brings concepts like physics, biology, and space closer to rural classrooms. Over 700 teachers in Gujarat have been trained to deliver this mission effectively.

Initiatives like the **Second Chance Program** empower school dropouts, particularly women, to pass their 10th standard exams, building confidence and pathways to independence. Programs such as Science on Wheels, Young Science Leader Competition, and Promoting Sports in Schools nurture creativity, teamwork, and holistic growth.

By adopting a "life-cycle" approach, Vidya provides continuous academic support, including Early Childhood Care & Education and Transitional Education, ensuring marginalized children can succeed. Vidyaa bridges socio-economic gaps, empowering communities and promoting long-term social impact through the transformative power of education.

Schools

Result Improvement

Improves academic performance through targeted strategies, impacting 60,000 students across various schools.

Promoting Science in schools

SCIENCE

TECHNOLOGY

ENGINEERING

MATHEMATICS

Promoting Science in Schools

Engages **20,000 students in STEM education, with 10,000 students** participating in the Science on Wheels mobile lab for hands-on learning and scientific exploration.

Digital Literacy

Enhances digital skills through basic programs like Microsoft Office, benefiting 50,000 students, preparing them for the modern workforce.

Transitional Education

Helps children transition smoothly from Anganwadi to formal schooling, ensuring a solid foundation for early academic success. 1000 children impacted so far

Remedial Support for Students

Equips children with essential life skills to navigate academic pressures and challenges, fostering effective coping mechanisms and promoting personal growth. 1000 children impacted so far.

innovative digital models.

STRENGTHENING HEALTH AT THE GRASSROOTS

At L&T Public Charitable Trust (LTPCT), our Aarogya initiative is dedicated to delivering essential healthcare to some of India's most underserved communities, particularly in remote and tribal areas. Through mobile healthcare units and community-based health projects, we ensure that healthcare reaches even the most isolated populations. Our mobile clinics play a crucial role, providing routine check-ups, basic treatments, and preventive care, reaching over 1.3 million beneficiaries in regions with limited access to

We believe that collaboration is key to amplifying our efforts, which is why we partner with local healthcare providers, NGOs, and Government health initiatives to strengthen the healthcare systems in these areas. Arogya's initiatives contribute to a range of health goals, from maternal and child health to curable blindness and the prevention of non-communicable diseases (NCDs). Ultimately, our aim is not just to address immediate healthcare needs, but to foster lasting wellness, build resilience, and instill healthy behaviors within the communities we serve. Through Arogya, we remain committed to making healthcare accessible, affordable, and culturally relevant for everyone.

य माहिती प्रणाली

क्षिण व उपचार याद्वारे वर्तजुकीस वालना दे सामाजिक आणि

MATERNAL & CHILD HEALTH INITIATIVES

These initiatives focus on the first 1,000 days, particularly improving the use of Maternal and Child Health (MCH) services, reducing low birth weight (LBW) among infants, and addressing high-risk pregnancies, reaching a large number of mothers and children to support healthy pregnancies and early childhood development.

ADOLESCENT HEALTH

Targeting adolescents through school and community-based programs, this initiative promotes health awareness, counselling, and interventions to address the unique health needs of young people.

CURABLE BLINDNESS

This program is on vision care by conducting vision screenings for both adults and children to detect and treat preventable curable blindness, ensuring improved eye health for vulnerable populations.

CAPACITY BUILDING

Training health workers, Anganwadi workers, and community mobilizers is a key part of this initiative to strengthen local healthcare delivery, enabling better community health management and support.

Infrastructure Upgradation: This program enhances healthcare facilities by upgrading sub-centers and block training centres, improving infrastructure such as sanitation, water supply, and waiting areas to support better healthcare services.

INFRASTRUCTURE UPGRADATION

This program enhances healthcare facilities by upgrading sub-centers and block training centres, improving infrastructure such as sanitation, water supply, and waiting areas to support better healthcare services.

HEALTHCARE FOR ALL

By organising health camps focusing on detection and management of non communicable diseases such as diabetes, and anaemia screenings, and timely referrals for further disease management we reduce the gap in out of pocket expenses in healthcare for the underserved populations, including migrant workers, this initiative strives to ensure equitable access to essential healthcare services.

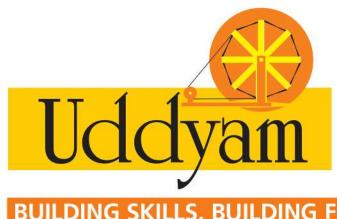

HEALTH SKILLING

LTPCT collaborates with Kotwalwadi Trust to enhance health skilling in underserved areas. This initiative focuses on training community health workers and local leaders in basic healthcare, first aid, and nutrition, equipping them to improve overall health outcomes in their communities. Through this partnership, LTPCT helps build local capacity for health and wellness, fostering sustainable development and better access to essential healthcare services.

COMMUNITY MENTAL HEALTH PROJECT SWATAH

The SWATAH initiative is dedicated to mental health and well-being, catering to individuals across various age groups. Through counselling services, awareness sessions, and support networks.

BUILDING SKILLS, BUILDING FUTURES

The Uddyam program helps people develop skills so they can build steady, long-term jobs to support themselves and their families. Whether it's through farm-based or non-farm-based opportunities, Uddyam empowers people to break free from the cycle of poverty.

Uddyam's approach extends beyond vocational training—it supports local farmers, providing support with different interventions such as solar drip irrigation units, farm ponds, which provide economic opportunities in rural areas. By fostering entrepreneurship and offering technical guidance, Uddyam ensures that communities can build robust, self-sustaining economies.

VOCATIONAL TRAINING

The Vocational Training component of the Uddyam Program aims to equip individuals from underprivileged backgrounds with marketable skills that increase employability. Through partnerships with local industries around the Anil Naik Technical Training Centre (ANTTC), the program offers courses in various fields, including fabrication, tailoring, electrical work, and solar. The focus is on practical, hands-on learning, ensuring that participants are well-prepared to enter the workforce and secure stable, sustainable employment opportunities.

The Anil Naik Technical Training Centre

(ANTTC), established in 2006 by the Larsen & Toubro Public Charitable Trust (LTPCT) and supported by the Naik Charitable Trust, represents a significant step towards empowering marginalised communities in Kharel, Gujarat. This vocational training hub is dedicated to equipping school dropouts, unemployed youth, and women with practical skills needed for gainful employment. The centre spans 5 acres and is well-equipped with state-of-the-art facilities, offering 13 courses including NSQF-aligned labs, 40-seater classrooms with digital learning capabilities, and an auditorium with a capacity for 700, enabling a conducive learning environment for its students.

At ANTTC, education is rooted in practical knowledge, with courses that span a variety of in-demand trades such as Electrician, Automotive Service Technician, Welder, Beauty Therapist, and Tally Program. What sets ANTTC apart is our commitment to practical, hands-on training. Students appreciate this approach, as it creates a tangible connection to their learning and a marked difference from traditional educational systems. Each course includes a dedicated day (saturday) for industry visits and workshops, students allowing to experience real-world environments, understand company cultures, and grasp industry norms. This experiential learning cultivates confidence and prepares them for the workforce.

ANTTC aligns closely with India's National Skill Development Mission and the broader Skill India initiative, which aims to develop a future-ready workforce. By incorporating sector-aligned placement for every program and collaborating with Sector Skill Councils for certifications, LTPCT ensures that its training programs meet national standards and the evolving needs of the job market. The introduction of programs for women, such as Beauty & Wellness Therapist and Tailoring, has increased women participation and it reflects a commitment to gender diversity and empowerment. ANTTC has successfully attracted a broad spectrum of women participants and has broken down stereotypes that have historically limited women's participation in various trades like welding, automotive and solar programs encouraging more women to enter skilled professions.

Furthermore, ANTTC's Second Chance Program provides school dropouts an opportunity to reintegrate into the formal education system while pursuing vocational training, demonstrating a holistic approach to education. The program not only focuses on technical skills but also emphasises the importance of soft skills and digital literacy, which are critical in today's job market.

AWARENESS & MOBILISATION

Community outreach programs raise awareness about skill development, livelihoods, and government schemes. Workshops and seminars encourage participation and resource utilization for economic growth.

CAPACITY BUILDING

Training programs enhance skills in agriculture, entrepreneurship, and leadership. Farmers, youth, women, and community leaders gain the confidence and knowledge to sustain development activities.

crop rotation, and drip irrigation. Modern equipment, high-yield varieties, and crop diversification ensure food

security and income stability.

■ WATER RESOURCE DEVELOPMENT

Solar lift irrigation systems, farm ponds, and rainwater harvesting enhance water availability. These measures support farming, reduce scarcity, and improve rural water access.

NATURAL RESOURCE MANAGEMENT

Uddyam focuses on forest conservation, soil health, and water management. Sustainable farming practices protect the environment and build resilience to climate change.

NON-FARM BASED ACTIVITIES

Vocational training in handicrafts, tailoring, and small-scale manufacturing diversified income sources. Uddyam helps establish small businesses in crafts, beauty, and food production, reducing reliance on agriculture. The Jan Sakhi program is one such initiative.

Jan Sakhi Program

EMPOWERING WOMEN

The Jan Sakhi Program by LTPCT empowers underprivileged women by fostering skill education, health awareness, and entrepreneurship. Using a Hub and Spoke model, Jan Sakhis engage in tailoring, toy-making, and community awareness, boosting their income and independence.

IMPACT

- Strengthens market linkages and connects youth to skill-building programs.
- Enhances health, education, and livelihood outcomes in rural communities.

SUCCESS STORY

Neeru Behen, a Jan Sakhi, has doubled her income by transitioning from domestic help to tailoring and crafting school bags. With her newfound skills, she now supports her children's education and mentors other women, fostering a cycle of empowerment within her community. Her journey highlights the transformative impact of LTPCT's initiatives, which enable individuals to achieve financial independence and inspire change in others.

ENSURING ACCESS TO CLEAN WATER

Water is essential to every community, and the Jeevan program provides clean, reliable water sources to help people thrive. The initiative involves implementing Solar Lift Irrigation to support the cultivation of second crops and providing water directly to households through Water Distribution and Supply Systems. With a focus on water resources management, the program has made significant strides in transforming barren regions into thriving agricultural hubs. To date, LTPCT has successfully implemented over 70 solar lift irrigation systems, benefiting more than 2500 farmers. This intervention has revolutionized water accessibility in rural communities, enabling farmers to shift from cultivating just one crop annually to producing up to three crops per year. Farmers now grow diverse crops, including paddy, millets, and vegetables (both

creeper and non-creeper varieties), significantly enhancing agricultural productivity and income. By providing a consistent and sustainable water supply, these systems not only improve yields but also empower farmers to make the most of their land throughout the year, fostering economic stability and food security.

These systems allow farmers to draw water from wells and sources using solar energy, significantly reducing reliance on conventional power sources and minimising environmental impact. Moreover, through the construction of around 300 check dams, benefiting around 1200 farmers and the establishment of more than 70 farm ponds helping around 350 farmers, LTPCT has enabled thousands of families to secure their livelihoods while fostering better

The impact of the Jeevan program extends beyond immediate water access; it promotes sustainable agricultural practices that are crucial in today's climate-sensitive environment. By improving irrigation techniques and supporting farmers in adopting better agricultural methods, we have witnessed an **average yield increase of 30%** in crops across beneficiary communities. This has been particularly vital in regions like Maharashtra and Gujarat, where farmers have historically struggled with water scarcity.

LTPCT's water management initiatives have significantly enhanced access to clean water in underserved areas, leading to a 40% reduction in water-related diseases such as diarrhea and dysentery. These interventions include solar lift irrigation systems, improved sanitation facilities, and hygiene awareness campaigns, which collectively ensure safe water practices and healthier communities. By addressing the root causes of waterborne illnesses, LTPCT fosters long-term health benefits and reduces the burden on local healthcare systems.

SOLAR LIFT IRRIGATION PROJECT

This project aims to enhance irrigation facilities for farmers by utilising solar energy. The initiative focuses on providing lift irrigation systems powered by solar energy, which are particularly beneficial in areas where electricity is unreliable or unavailable. These systems use solar energy to pump water from rivers, lakes, or groundwater, lifting it to areas up to 3 kilometers near the river. This provides water to agricultural fields that would otherwise remain dry and unproductive, enabling farmers to irrigate crops in high, arid, or remote locations.

The solar-powered system helps reduce farmers' reliance on fossil fuels and electricity, leading to lower operational costs and promoting environmental sustainability. Farmers can now irrigate their lands more efficiently, increasing crop yield and ensuring a steady income. This innovation not only enhances agricultural productivity but also improves the livelihoods of farmers by providing them with greater control over their irrigation needs, even in challenging geographical areas. By lifting water to previously inaccessible areas, LTPCT's initiative is helping communities overcome barriers to sustainable farming.

The implementation of these systems not only supports agricultural productivity but also contributes to a healthier environment by reducing carbon emissions and fossil fuel consumption. The substantial number of beneficiaries indicates the program's effectiveness in transforming farming practices and enhancing the livelihoods of many families across the region.

287,102.4

106,975.2

Water Distribution & Water Supply Systems

LTPCT also focuses on enhancing water distribution and supply systems, ensuring that communities have access to safe and adequate water for domestic and agricultural use. This initiative helps to improve overall public health and quality of life, especially in rural and underserved urban areas.LTPCT also focuses on enhancing

Projects under this initiative include the construction of water supply infrastructure, such as pipelines, new borewells, solar water pump facilities, storage tanks to ensure efficient distribution of potable water. By addressing water scarcity and improving access, these systems have been crucial in supporting not only agricultural needs but also daily living requirements of communities.

Soil Testing & Land Levelling

The Soil Testing and Land Levelling initiatives aim to enhance agricultural productivity and sustainability for smallholder farmers. These interventions are critical in optimizing land use, improving crop yield, and reducing environmental degradation.

- Provides farmers with insights into soil health, nutrient levels, and pH balance, enabling them to choose the right fertilizers and crops.
- Promotes sustainable farming by preventing overuse of chemical fertilizers, ensuring long-term soil fertility.
- Ensures uniform water distribution during irrigation, reducing water wastage and enhancing crop growth.
- Makes previously unproductive or uneven lands viable for farming, boosting agricultural acreage and income.

SOCIAL ENTITLEMENT PROGRAM

The Social Entitlement Program by LTPCT addresses the critical need to connect underserved communities to government welfare schemes and entitlements, tackling issues of exploitation and lack of awareness.

and transform their lives.

Balancing her household duti s and farm work, Urmila attended classes from 12 to 3 pm, determined to reclaim her identity. Her first milestone was learning to sign her name, ending years of dependence on others for important documents. She even taught her 50-year-old mother-in-law to sign, sharing the empowerment she felt.

Beyond academics, Urmila gained digital literacy, learning to navigate WhatsApp, which became essential in her new role as Village Coordinator for Dadade Gram Panchayat. Overseeing 19 hamlets, she conducts surveys, ensures government schemes reach the right families, and raises awareness about irrigation solutions like farm ponds and desilting.

This journey transformed not just her skills but her confidence. Once confined to traditional sarees, Urmila now embraces salwar suits and dresses, reflecting her evolving self-image. Her dreams now extend to her children, envisioning her daughter as a doctor—a goal that once felt impossible.

Urmila's story is a testament to the power of education. With her newfound independence and vision, she inspires her community to believe in second chances and the ability to dream again

'Against All Odds: Lily's Fight for a Better Tomorrow'

In the modest streets of Navsari, Gujarat, 21-year-old Lily Agnel Rudri stands as a beacon of resilience. Born into a family battling poverty and abuse, her life has been shaped by struggles. Her mother, a former waste collector turned daily wage worker, displayed immense courage by filing a case against Lily's abusive, alcoholic father, setting a powerful example for her daughter.

Forced to leave school after the 11th standard to support her family, Lily took on responsibilities that belied her years.

At 18, Lily's life took a transformative turn when she joined the Solar Panel Technician Training program at the Anil Naik Technical Training Centre (ANTTC) in Kharel. As the only girl in a male-dominated classroom, she faced skepticism but won over her peers with her determination and warmth. Completing the course, she secured a job at Goldi Solar, earning a steady income of ₹13,500, all of which she selflessly contributes to her family.

Lily dreams of becoming an Army Officer but has faced setbacks due to her height. Yet, her spirit remains unbroken. She trains in kushti (traditional wrestling) and challenges societal norms, proving that gender is no barrier to ambition.

Empowered by LTPCT, Lily has become her family's primary breadwinner, inspiring young girls with her unwavering belief.

"Fight for yourself and your dreams. If I can do it, so can you."

DARSHANA BEHEN'S JOURNEY FROM UNCERTAINTY TO HOPE

In Chonda, a village in the Vansda block, Gujarat, a 25-year-old, Darshana Behen Vinesh Bhai Gawda's story is one of courage and transformation. Married at 20, Darshana entered a multi-generational household, carrying the weight of family responsibilities. When she became pregnant for the first time, she faced uncertainty, unaware of the nutrition and care needed for a healthy pregnancy. Like many women in rural India, she navigated this crucial time without proper guidance.

Her life changed when LTPCT, in partnership with the Chetna Foundation, brought maternal health programs to her village. Through these programs, Darshana learned about the importance of nutrition, regular check-ups, and understanding her body's needs. "When they explained the 1000 Days approach, it was like a light turned on for us," she recalls. For the first time, she understood how to take care of herself and her baby.

But this change didn't stop with Darshana. The program involved her entire family—her husband, parents, and even grandparents—helping them realize that a woman's health during pregnancy is a shared responsibility. "We now go every month as a family for check-ups," her husband shares. "Knowing we can monitor the baby's health has brought us peace of mind."

n her second pregnancy, Darshana felt empowered. She knew what to expect, and her family stood by her every step of the way. Today, she's an advocate for maternal health in her community, encouraging other women to take charge of their well-being.

Darshana's story is a reminder of the power of education, support, and family unity. Thanks to LTPCT's healthcare programs, she went from uncertainty to confidence, and now, she's helping other women do the same. It's proof that when we reach the unreached, lives change.

Real Lives, Real Change

DARPAN SOLAR GROUP SHAPING TOMORROW

In a quiet village by the Gira River, nine women came together with a shared dream: to break free from a life of struggle and limited opportunity. For years, their livelihoods were tied to the unpredictable rains, leaving their fields dry for most of the year. The Gira River flowed nearby, but without the means to harness its water, they had little hope. Many thought about leaving for the city, but then LTPCT arrived, offering not just help but a fresh chance for a brighter future.

The journey began with a simple visit to a solar unit, where the women saw how renewable energy could change their lives. Inspired, they returned home with new hope. LTPCT stepped in to bring infrastructure—a borewell, a solar-powered water pump, and pipelines that reached every home within 100 meters. For the first time, they had a steady water supply. It wasn't just water; it was a lifeline.

With this new resource, the women transformed their barren fields. They could now grow crops twice a year instead of just once. Their yields doubled, and their incomes soared. From ₹30,000 to ₹80,000 in just one season—a change they never imagined. "We're not just surviving anymore, we're thriving," one woman said, her voice full of pride.

But the story doesn't end there. Recognizing the demand for water, the group decided to share their pump with neighbouring farmers, charging ₹20 per hour. They've saved ₹13,400 so far, and are planning to introduce drip irrigation to make every drop count.

With stable incomes, they're giving their children the future they dreamed of. One woman beamed,

"My daughter wants to be a doctor. For the first time, I truly believe it's possible."

Darpan Solar Group's transformation is proof of what happens when people are given the tools and support to succeed. These women have found strength in each other, turning their dreams into reality and creating a self-sufficient, thriving community. Their journey is a testament to the power of hope, hard work, and the belief that change is possible—no matter where you start.

Moving Forward Together

LARSEN & TOUBRO Public Charitable Trust

As we draw the curtains on the year 2023-24, LTPCT stands at the intersection of hope and possibility, inspired by the resilience of the communities we serve. Our belief that "areas can be small, but the impact of people must be huge" is embodied in the progress we've witnessed, particularly in Gujarat's tribal regions, where thousands of individuals have experienced meaningful growth. Every initiative we undertake tells a story of untapped potential. Take Lily, who transformed her future through vocational training at the Anil Naik Technical Training Centre, becoming a skilled electrician. Her journey not only changed her life but also inspired others to dream big. In Subir, sustainable water management has revived agriculture, enabling 700+ families to return home and thrive, free from seasonal migration. These efforts focus on long-term growth, cultivating resilience, and building a sustainable future.

At LTPCT, we know that change is a gradual process, marked by challenges. Yet it is in these challenges that we find our purpose: creating inclusive pathways for communities to rise and succeed. As we move forward, let us carry the light of these stories in our hearts. Together, we can weave a narrative of empowerment that resonates beyond borders, echoing the dreams and aspirations of countless individuals. Thank you for your unwavering support in this transformative journey. Let us continue to forge ahead, committed to change, and dedicated to building a brighter tomorrow for all.
